CRAFTED & HAND FINISHED

traditional brassware

The St James Collection is traditional bathroom style distilled to its very essence. Confident enough to integrate with one another by shape and design, elegant and timeless enough to create beautiful bathrooms bespoke to you.

With precision engineering, components are cast from solid brass and hand polished, making the superior quality of the St James Collection second to none. Using only the finest materials no compromise is made in the attention to detail applied in the creation of our hand finished showers, taps and accessories.

BEAUTIFUL BATHROOMS

for years to come

Inspired by the classic lines of the Victorian period, the St James Collection is handcrafted with solid brass of unequalled finish together with fine English porcelain.

There has been no compromise in creating this stunning collection of showers, taps and accessories that provides exceptional bathroom beauty for years to come.

Each product is individually inspected and tested to ensure excellence in every aspect of design, engineering and finishing. Our 10-year guarantee* reinforces this commitment.

*brassware is covered for 5 years
for commercial installations

MAGNIFICENT

presence

Synonymous with unrivalled quality, the St James Collection is trusted by some of the world's most luxurious hotels and private residences. Adorning the majestic bathrooms of Windsor Castle to the luxurious en-suite bathrooms of worldwide hotels. The St James Collection expresses magnificent presence to discerning customers throughout the world.

personalise your **FINISH & STYLE**

Providing a personal expression for your bathroom design, the St James Collection offers you the most comprehensive selection of styles and finishes in traditional brassware. Choose from our distinctive handle styles in solid brass; with the London Handle, London Lever and England Handle complemented by fine English porcelain, whilst the England Lever is solid brass.

From bright chrome to bright nickel, antique gold to brushed nickel, each finish is durable and a considered choice to enhance your chosen traditional brassware style. All showers, taps and accessories are available in these four beautiful brassware finishes.

HOW TO CODE YOUR PRODUCT

On selecting your product, use the individual product code and select your finish, followed by your chosen handle style.

SJ100CPEH
(Product-Finish-Handle Style)

All taps & mixers are supplied with 1/4 turn ceramic disc operation. **However, if you prefer the option of screwdown operation on our cross top handle products, add SD to the code.**

 SCREWDOWN **SJ100CPEHSD**

Additional options include the choice of black levers and indices on all handle styles (with the exclusion of Hampton), black porcelain stems on our selection of accessories and mirrors, whilst our heated towel rails are available with black cast iron fins.

To include this option in your product choice, add BK.

 BLACK OPTION **SJ100CPEHBK**

STUNNING *in* BLACK

Imparting a stunning elegance to your bathroom, each of the St James Collection lever styles are available in black metal and black English porcelain, as are the indices for the handle options and the stems on our accessories.

Our striking black heated towel rail makes a distinctive statement allowing expression of your unique style.

perfect
DETAIL

Co-ordinate a traditional look right down to the last detail with the St James Collection of bathroom accessories. Made from high quality brass and fine English porcelain, in both white and black, completes those finishing touches.

SHOWERING

RELAX – RESTORE – REFLECT

The luxurious shower options from the St James Collection allow your shower time to be as unique as you. With a wide selection of valves, roses, and accessories you can create a tailored arrangement perfect for your showering experience.

Alternatively be inspired by our selection of hand-picked shower combinations ready to complement your traditional bathroom.

HAND-PICKED SHOWER COMBINATIONS

Through our experience, the St James Collection has brought together a beautiful selection of sought-after shower combinations ready for your traditional bathroom. With the traditional design cues synonymous with the St James Collection, these combinations provide a complete offering of thermostatic shower valves and shower kits alongside a complementary shower rose and selection of accessories. These combinations can easily be created from the components in this brochure, alternatively if you need assistance get in touch with us on 0121 358 1555.

DESIGNING YOUR SHOWER

The St James Collection celebrates the rich potential in each of us to create a unique arrangement designed to inspire our individual showering experiences.

The possibilities are endless with a comprehensive selection of **shower valves** in a finish and handle style of your choice. Combined with an array of **shower kit options** and **shower roses** available in various sizes and styles to complement your bathroom design.

Coupled with those **finishing touches** including a range of handshowers and body jets for your added convenience and comfort, **your personal design is tailored to you and your installation requirements.**

1. SHOWER VALVE

Firstly select a thermostatic or manual valve and then choose from either a concealed or exposed style.

Select a finish and handle style of your choice.

See pages 26-47 for all available shower valves.

2. SHOWER KIT

For exposed valves select a riser kit (see pages 48-51). If you choose the added option of a handset you will require a diverter either integrated or separate.

For concealed valve choice, select a concealed shower kit, including a shower arm and shower rose.

BLACK OPTION AVAILABLE ON ALL HANDLE STYLES.

For more information about all handle options and finishes see page 12.

3. ROSE

From relaxing to restorative, your choice of shower rose size and style is designed to achieve your desired shower experience.

See pages 52-53 for all options available.

4. FINISHING TOUCHES

Complete your luxurious shower design with finishing touches including a range of hand showers and body jets. See pages 56-60 for all options available.

WITH ALL THESE POSSIBILITIES, YOUR SHOWER
CAN BE AS UNIQUE AS YOU.

TRADITIONAL THERMOSTATIC VALVE – CROSS TOP

The St James Collection traditional shower valve provides authentic elegance, coupled with modern performance. Including both concealed and exposed shower valves, our shower valve is available with all handle and lever styles in all four finishes. See page 12 for all options.

TRADITIONAL THERMOSTATIC VALVE – LEVER

Thermostatic shower controls are fitted with an internal cartridge which automatically mixes the hot and cold water to a pre-selected temperature when the shower is switched on. This temperature will be maintained throughout the duration of the shower regardless of changes in the hot and cold water pressure. Should there be a failure or significant reduction in the cold water supply, the cartridge will automatically shut down, preventing the risk of scalding.

SHOWERING
TRADITIONAL VALVE

LEVER

CLASSICAL THERMOSTATIC VALVE – CROSS TOP

Echoing traditional Victorian design, the classical valve heralds a refreshingly contemporary styling with its clean lines, allowing it to be positioned in both traditional and modern bathroom settings. Including both concealed and exposed shower options, the classical shower valve is available with all handle and lever styles in all four finishes. See page 12 for all options.

Each St James Collection thermostatic shower is fitted with the very latest in thermostatic cartridge technology that ensures optimum temperature control and safety. The thermostatic showers are also dual control, so that water flow and water temperature can be independently operated.

ACCESSORIES

Co-ordinate a traditional look right down to the last detail with the St James Collection of bathroom accessories. Made from solid grade brass and using only the finest English porcelain, available in both white and black completes those finishing touches.

TOWEL ACCESSORIES

All towel accessories are available with either a plain metal stem in all four finishes or with a black/white porcelain stem to complement the fine English porcelain on the tap handles, toilet cistern handles and basin plugs. See page 12 for all finishes.

Available with England or London handles only.

LUXURY CERAMICS

Exclusively reserved for discerning developments, luxurious hotels and private residences, clients around the world trust the St James Collection of luxury ceramics.

Our selection of British made traditional basins, bidets and WCs take design cues from the Edwardian era through to those of the Art Deco period. Made from the finest china clay, each ceramic piece is moulded, glazed and hand finished to the very highest specification.

Unique customisation including personalised branding for our clients, allows for a distinctive and bespoke statement throughout both period and contemporary settings.

OAKMERE

Based upon an Edwardian design style, the beautiful Oakmere range of luxury ceramics, sits comfortably in both a strictly traditional or more contemporary bathroom setting. Oakmere's delicate splashback feature runs throughout the collection of basin, bidet and toilet cistern options providing a collection with design continuity and accurate proportions.

OAKMERE BASINS

All ceramic basins are made from the finest British china clay with each piece moulded, glazed and hand finished to the very highest specification. The Oakmere basin is presented with the option of a ceramic pedestal or a basin stand available in all four finishes alongside an inset vanity basin. See page 12 for all finishes.

BASIN (600MM)

HELIGAN

Created around bold, clean and distinctive lines the Heligan range of luxury ceramics encompasses all that is Art Deco in its basic design from. Inspired by iconic global architecture and design, the bold, clean and distinctive lines characterise the collection of basin, bidet and toilet cistern options, sitting well in traditional and contemporary settings.

HELIGAN BASINS

All ceramic basins are made from the finest British china clay with each piece moulded, glazed and hand finished to the very highest specification. The Heligan basin options present the winged basin with ceramic legs, an inset vanity basin and basin with ceramic pedestal.

HAMPTON

A range of luxury ceramics that exudes quality in both design and aesthetics, the Hampton range displays curvaceous lines that accentuate the opulence of the Victorian period. This beautiful collection of basin, bidet and toilet cistern options fit perfectly into the traditional period styling of a bathroom.

HAMPTON BASINS

All ceramic basins are made from the finest British china clay with each piece moulded, glazed and hand finished to the very highest specification. The Hampton basin options present a cloakroom basin and large basin both with the option of a ceramic pedestal or basin stand in all four finishes. See page 12 for all finishes.

*HEATED TOWEL RAIL FUNCTION & INSTALLATION INFORMATION

DUAL FUEL SUMMER FUNCTION

All St James Collection radiators are supplied as standard with an electric heating element that can be used independently from the central heating system. When using the electric element during summer months an allowance has to be made for thermal expansion within the radiator. This allowance can be achieved by fully closing the flow in-take valve and partially opening the flow outlet valve preventing the water cycling the system.

By setting the valves in this position will allow for any thermal expansion to disperse into the central heating system. Dual fuel models must never be operated without being bled of air and are full of water and being part of the central heating system.

WINTER OPERATION FUNCTION

During winter months the electric element must not be operated in tandem with the central heating system as this will damage the heating element and invalidate the element guarantee.

ST JAMES RADIATORS

All St James Collection radiators are to be installed in compliance with BS5449 - BS7593 - BS7671 to avoid invalidation of the guarantee.

CAST IRON

Radiators with cast iron parts must only be used in a closed indirect system, incorporating a good quality rust inhibitor.

HEAT OUTPUTS

Are shown in 60° Celsius.

To convert to the Euro norm at 50° Celsius BSEN442 multiply by 0.79.

To convert watts to BTU multiply by 3.4121.

Use 50° Celsius output figures when using a condensing boiler.

INSTALLATION & OPERATING REQUIREMENTS - UK ONLY

We recommend that our range of radiators are suitable for closed and indirect heating systems only.

In the event of replacing or adding a radiator to the system it should be cleaned and flushed in accordance with BS7593 standard.

We recommend that this work is undertaken by a Gas Safe qualified registered plumber and the work is carried out in compliance with current building regulations by adding a good quality water treatment inhibitor to the heating system to protect against scale and corrosion and build up of sludge.

ELECTRICAL INSTALLATION REQUIREMENTS

We recommend that a competent qualified electrician who has sound knowledge of I.E.E regulations carry out any electrical work, which should meet the I.E.E requirements. Always ensure that all rails are earth bonded and dual fuel models are fitted with the appropriate residual circuit breaker.

GUARANTEE OFFER - UK ONLY

PRODUCT AND COMPONENT PARTS

Retail: The St James Collection products and their component parts as purchased and used in the UK are covered under the Marflow guarantee for a period of 10 years.

Commercial Installations: The St James Collection brassware and their component parts as purchased and used in the UK are covered under the Marflow guarantee for a period of 5 years, and the luxury ceramics for 25 years.

It will apply where, after the products are put into service, a defect is discovered or arises under normal use, which is related to a design fault, materials or workmanship. In this instance we agree to remedy the defect either by replacement or repair at our expense. Full details are included with each product.

BRASSWARE FINISHES

Bright Chrome finish is guaranteed for ten years with all other finishes being guaranteed for two years subject to the terms of use set out in our guarantee offer.

PRICING & SPECIFICATION

All prices are inclusive of VAT at rate of 20% where applicable.

All dimensions are in millimetres, unless otherwise specified.

All products are for UK low-pressure installations. Minimum 0.2 bar recommended unless otherwise stated.

WRAS APPROVAL

Approval No: 1410026

The St James Collection traditional shower valve is WRAS accredited, with pending approval for the classical shower valve.

WRAS Approval covers the following products; Traditional 2 port valves - exposed & concealed; Traditional 3 port valves - concealed.

It does not cover the exposed valve with bath filler spout or those valves with built in diverter options.
